

# How to Trim

① Make sure that your clay is LEATHER HARD.

you will know it's leather hard if you can NOT make a finger print but can easily make a nail mark

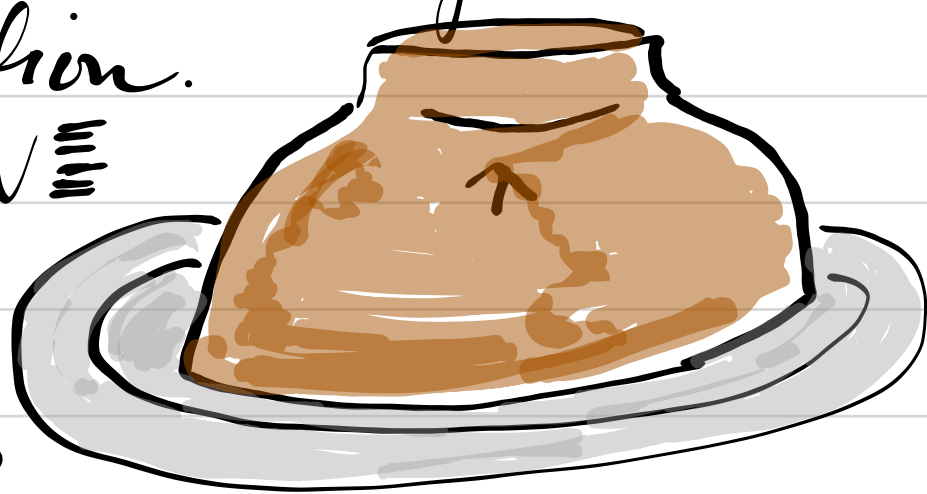

② Center the pot on the wheel using the needle tool. Slowly inch the tool up to the side of the pot. Once it hits, freeze.

③ Find the mark made on the side of the pot. Put your thumb in the middle + nudge it in the opposite direction.

④ CHECK AGAIN 

Remember, this is the most

ANNOYING STEP

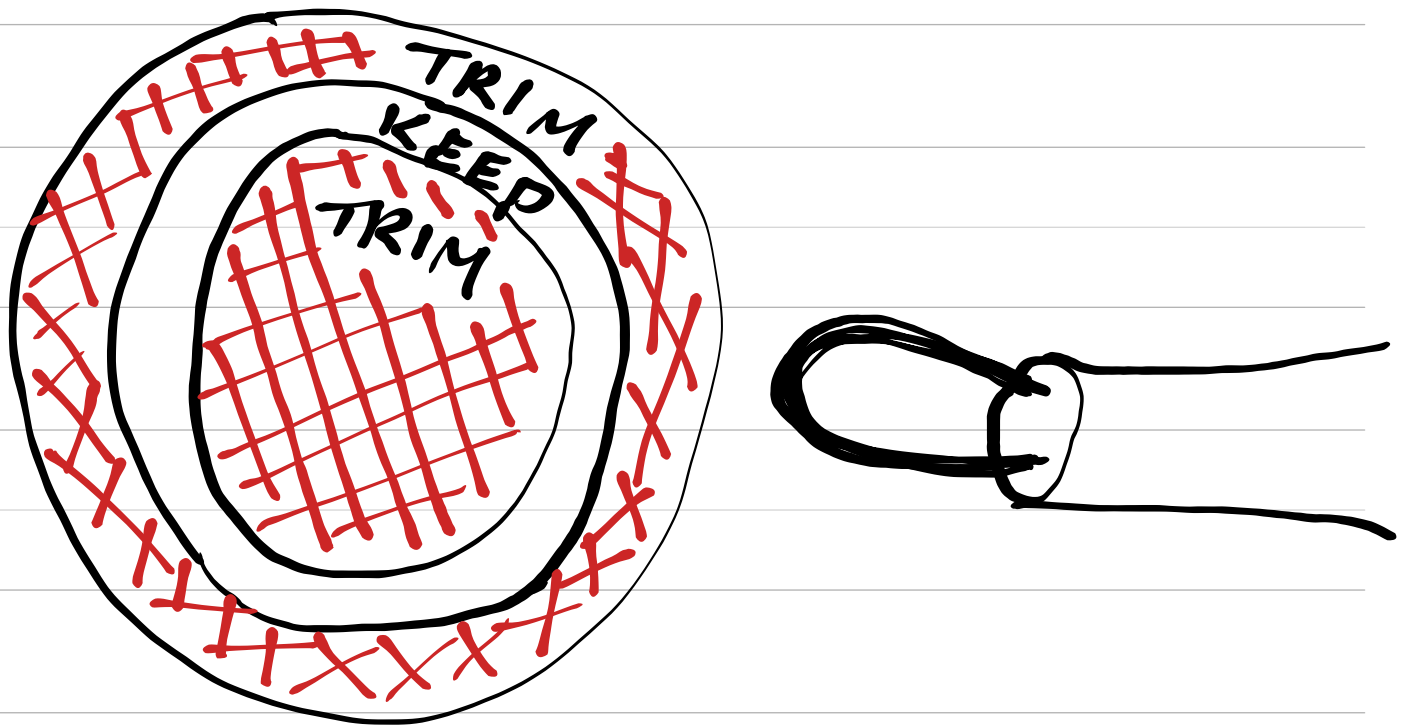

but it's important... secure w/ clay lugs

⑤ Now, use the flat end of the loop tool, make a notch in the top and travel downwards.

⑥ Now do the same at the top. Angle the tool inwards. Make a notch on the top and go in towards the center. Then flatten tool to smooth

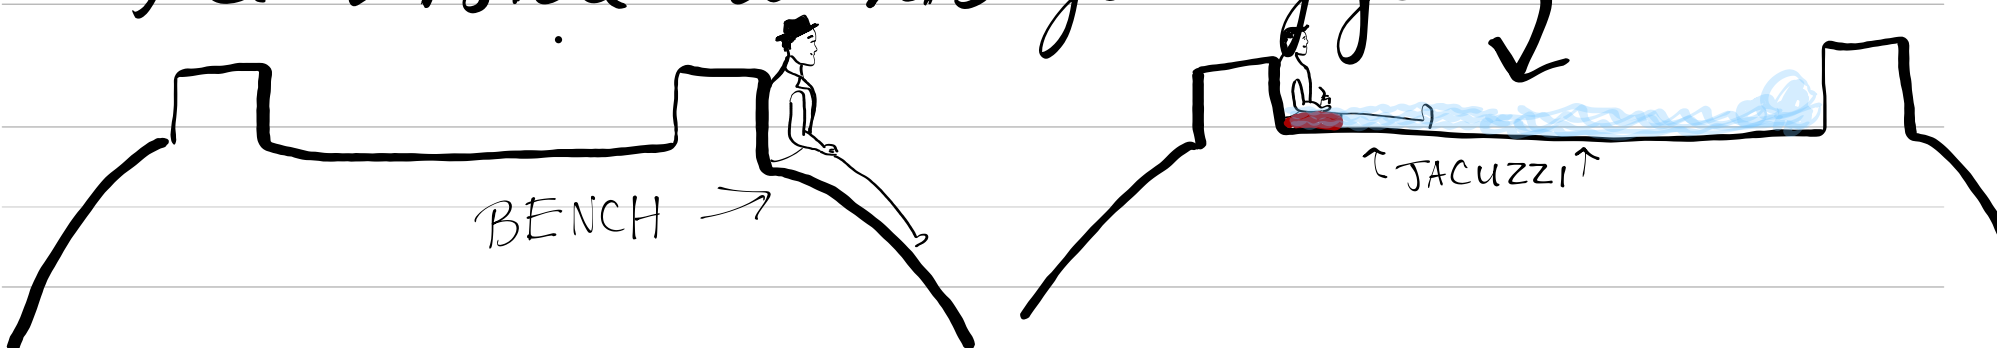

⇒ 5 + 6 ARE THE BLANK CANVAS STEP ←

⑦ Map out the foot ring. Remember:  
Trim, Keep, trim

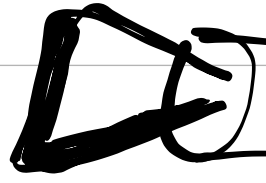

⑧ Turn the tool to round side + Start the "ROUGH CUT"

⑨ Remember the worlds smallest person! we will be catering to him. The outside of the foot is his round bench. The inside is his jacuzzi.

10) Now go back to the flat side + CRISP the edges up

11) Once you tap the pot + it sounds loud + hallow like a drum, you are almost done!

12) Now JIMMY BUFFETT to smooth out the sides.

use the round end

13) DONT FORGET YOUR NAME!  
WE CANT HAVE NO NAME POTS OF SHAME!

14) put on greenware Cat. record the pot, date, and what Cat you put it on.

**CRUSHED IT!** = Don't worry if

something bad happened, that just means you're VERY

**BRAVE!**

Start Again!
